

CHOICE® WEATHER MASTER is a water conditioning agent for use with agricultural chemicals. Designed for hard water conditions, this liquid formulation locks up hard water cations, allowing maximum herbicide performance and is compatible with all formulations of glyphosate.

PRODUCT FEATURES

- Water conditioner with multiple sequestering and complexing agents
- Liquid formulation

GROWER BENEFITS

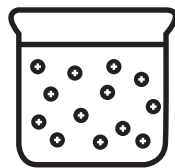

- Reduces effects of hard water on herbicide performance
- Binds multiple hard water cations, such as calcium, manganese, magnesium and potassium
- Convenience of treating 1000 gal with 2.5-5 gal of liquid instead of 100-200 lbs of dry product

RATES

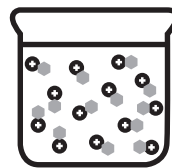

1-2 qts/100 gal spray solution

DATA & RESULTS

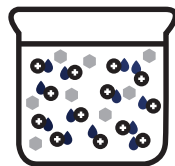

ACTION OF CHOICE WEATHER MASTER IN HARD WATER

Hard water with cations

Addition of certain active ingredients actually "lock-on" to the cations.

The addition of CHOICE WEATHER MASTER results in it "locking-on" to the hard water cations. This prevents hard water cations from interfering with the herbicide performance.

● Hard water cations ● Active ingredient ● CHOICE WEATHER MASTER
