

FRANCHISE CO-PILOT is a premium NPE-free surfactant that is specifically formulated for aerial applications to increase droplet deposition while minimizing variability in performance. FRANCHISE CO-PILOT is fungicide friendly and provides improved mixability as it combines a **LECI-TECH®** surfactant system with a compatibility agent, differentiating it from other surfactants.

WITH LECI-TECH TECHNOLOGY 

To the plant:
Drift reduction with performance-sized droplets

On the plant:
Droplet retention by adhesion and spreading

In the plant:
Increased penetration without cuticle disruption

PRODUCT FEATURES

- Designed to enhance aerial applications
- Offers improved mixability
- Contains LECI-TECH, a unique technology that assists in overall spray performance

GROWER BENEFITS

- Improves droplet deposition and spreading

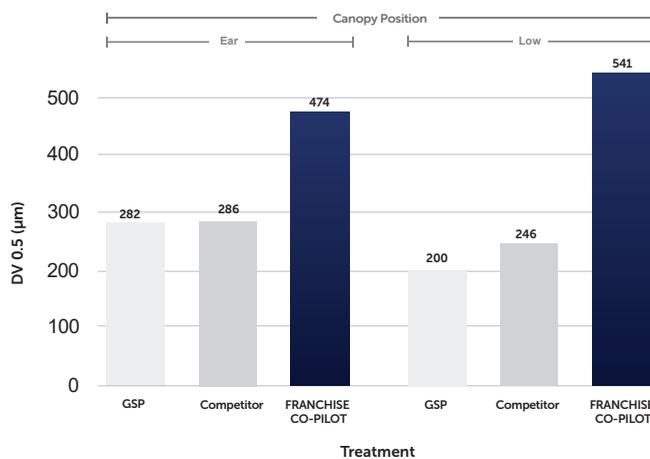

RATES

0.25 % - 0.75% v/v

DATA & RESULTS

I DROPLET SIZE DISTRIBUTION

Dansville, NY & Patoka, IN - 2024

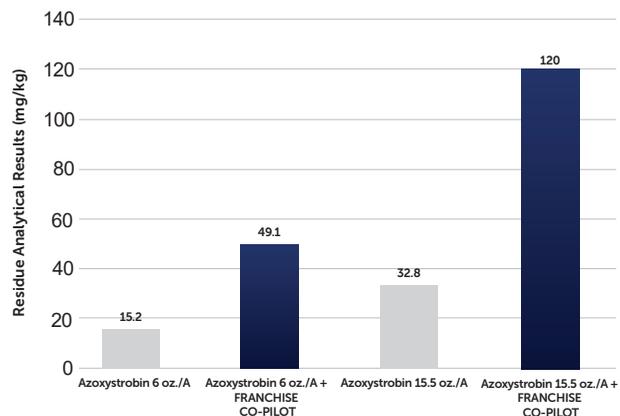

FRANCHISE CO-PILOT improves droplet distribution, resulting in improved coverage, reducing the likelihood of pesticide drift, and increasing efficiency.

Droplet size >200 µm has better drift control.

I PENETRATION EFFECT OF FRANCHISE CO-PILOT

Azoxystrobin (mg/kg) in Plant

FRANCHISE CO-PILOT allows 3X more of the active ingredient into the plant.
