

REFORM

REFORM is an insecticide synergist designed specifically to work with pyrethroids to provide greater insect control. REFORM is an additive that extends resistance management by improving the efficiency of the active ingredients in the insecticides and acaricides used. REFORM is highly effective in providing faster knockdown and greater control in resistant populations.

PRODUCT FEATURES

- Insecticide synergist to provide greater insect control
- Compatible with many AI's

RATES

See label for specific use rates.

DATA & RESULTS

GROWER BENEFITS

- Helps pyrethroids perform better than they do alone
- Provides faster knockdown and greater control in resistant populations
