

INTIMIDATOR®

S-METOLACHLOR	GROUP	15	HERBICIDE
METRIBUZIN	GROUP	5	HERBICIDE
FOMESAFEN	GROUP	14	HERBICIDE

INTIMIDATOR® is a soybean pre-emerge herbicide that combines three modes of action for grass and broadleaf weed control. By providing excellent burndown activity and long-lasting residual, INTIMIDATOR can fight resistant weeds and get soybeans off to a strong start.

PRODUCT FEATURES

- Unique formulation with three active ingredients and three different modes of action from three different chemical classes
- Moderate fomesafen rate

RATES

2-4 pts/A

GROWER BENEFITS

- Provides broad spectrum weed control in one pass (both grass and broadleaf control)
- Burndown activity and long-lasting residual provides the best possible start for the crop
- Still able to apply fomesafen post application
