

N-PACT[®]

26-0-0

N-PACT[®] (26-0-0, with SRN) is an enhanced slow-release nitrogen which provides a stable source of foliar nitrogen with the addition of a controlled release nitrogen component supporting uptake and utilization of nitrogen for excellent crop safety and flexibility in application timing – fitting the needs of an array of crops and their needs.

FEATURES

- Enhanced slow-release nitrogen (SRN) provides a stable, long-lasting source of foliar nitrogen for increased uptake and assimilation.
- Reduced nitrogen volatility and superior crop safety allow flexible application timing across multiple crop stages.
- Suitable for most specialty and field crops to correct nitrogen deficiencies and help plants recover from stressful conditions.

ANALYSIS

26-0-0 w/ 33% SRN

GROWER BENEFITS

- Promotes major nutrient utilization, supporting photosynthesis and protein development for improved crop growth.
- Increases tolerance to stress factors such as drought and salinity, resulting in more resilient plants.
- Drives higher yield potential and improved crop quality through efficient, targeted foliar nutrition.

RATES

1-3 gallons for most crops

V3-V8 or R Stages
