

PRO IRON 5 is part of a line of Pro Micronutrient products designed primarily for soil application but with the added flexibility of foliar uses to address the needs of a variety of crops across a range of cropping systems. Formulated with chelators and sequestering agents in addition to EDTA forms of metals, PRO IRON 5 from Loveland and available exclusively from Nutrien Ag Solutions provides compatibility and application flexibility to provide the results growers like you demand.

FEATURES

- Formulated in the highly available HEDTA form of Iron for greater availability across a range of soil types that most other forms of Iron
- Built with Chelating and Sequestering agents for compatibility and efficiency in many tank mix situations
- Sound formulation is convenient and reliable in many soil environments

RATES

1-4 qts/A per application in most At-Planting or Drip, Drench & In-Line applications

ANALYSIS

6-0-0 5% Iron

GROWER BENEFITS

- Iron serves as an activator for biochemical processes such as protein synthesis and forming of respiratory enzyme systems.
- Iron is an important part of the nitrogenase enzyme which effects N fixation in N fixing plants.
- Provides bioavailable Iron across a broad range of soil environments to aid in important metabolic processes like protien synthesis and lignin formation
