

REAX™ PLUS MAGNESIUM delivers advanced magnesium nutrition powered by C² Technology and Carbon-Based Biocatalyst Technology. These technologies maximize nutrient availability and uptake and a crop's ability to endure abiotic stress like heat or drought conditions. REAX PLUS MAGNESIUM is a liquid magnesium designed for drip, drench, and inline application with flexibility for foliar use.

PRODUCT FEATURES

- Unique C² formulation improves overall nutrient availability, maximizing magnesium uptake
- Carbon-Based Biocatalyst Technology enhances magnesium mobility and supports plant resilience against abiotic stress
- Plant-safe nutritional formulation is flexible for soil and foliar applications across various crops and growing conditions

ANALYSIS

0-0-0 3% Mg 4% S

MAGNESIUM AT-A-GLANCE:

- Essential for chlorophyll production.
- Drives photosynthesis and energy generation.
- Supports enzyme activation
- Enhances protein synthesis and overall plant metabolism
- Improves nutrient transport, particularly phosphorus.

GROWER BENEFITS

- REAX PLUS MAGNESIUM strengthens photosynthetic efficiency, boosting plant energy, and vigor
- Supports soil microbiota, fostering biologically active and healthier soil conditions
- Enhances buffering capacity, moderating accumulated salt effects for improved soil health
- When applied at key growth stages, REAX PLUS MAGNESIUM promotes balanced growth, nutrient efficiency, and overall crop resilience

RATES

- Soil application: 1-8 qt/A
- Foliar application: 1-4 qt/A
