

AWAKEN FLOWBOOST is a premier seed lubricity agent available from Loveland Products. It contains a unique blend of nutrients to help promote early season growth and nutrient uptake. Additionally, it provides top tier seed lubrication to achieve better seed singulation, as well as extremely low dust-off properties.

GROWER BENEFITS

- The availability of molybdenum can improve nodulation and nitrogen efficiency
- Flexibility for use as a seed finisher or in the planter box
- Can be used to help reduce seed bridging
- Promotes nutrient uptake with a unique blend of nutrients to help a crop maximize early-season growth
- Relieves transient nutrient deficiencies associated with cold and wet soils
- Beneficial to soil with low plant-available phosphorus
- Improves singulation with high-end seed lubricant, reducing the number of skips and doubles

RATES

3 oz./unit of seed
