

EQUITY VAYO is the next generation of seed treatments from Loveland Products. This is an in-can formulation with a potent six-way insecticide + fungicide seed treatment for soybeans. EQUITY VAYO delivers multiple modes of action to help fight soil born disease resistance, improved control of pythium and phytophthora, and controls a broad spectrum of insects. Growers can have the confidence every seed planted will contribute to maximum yield potential on every acre.

FEATURES

- Six-way formulation including five fungicides and one insecticide
- Includes Picarbutrazox, a premium fungicide component for superior pythium and phytophthora control
- Low and efficient use rate, pre-colored red

GROWER BENEFITS

- Promotes resistance management to pythium and phytophthora
- Low use rate for drier seed and better handling
- Faster emergence and timing to canopy
- Provides better stress tolerance, nutrient uptake and improved vigor
- Flexibility to include additional treatment options

ACTIVE INGREDIENTS

Mefenoxam, Fludioxonil, Sedaxane, Thiabendazole, Picarbutrazox, Thiamethoxam

RATES

4.00 fl/oz per 100 lbs or 1.86 fl/oz per 140k
